

Geography

Intent

To deliver a rich, relevant curriculum which inspires pupils' curiosity and fascination about the world and its people and the relationship between them.

To help develop geographical skills, concepts and subject knowledge in order to turn learners into young geographers.

To encourage children to notice what is happening in their world and to understand how this affects their lives on a personal level in their own locality.

Implementation

A learning challenge question based study to focus learning and teaching.

A vocabulary rich delivery which is agreed upon prior to teaching to ensure consistency and progression.

Knowledge organisers and displays actively used to consolidate and support learning.

Books linked to learning readily available in the classroom.

Pupils are taught in a variety of ways, using a variety of resources and our local environment to make the subject come alive.

Impact

To develop a love of Geography and encourage the 'young geographers' within them.

To be able to talk about their learning using the relevant vocabulary.

To access quizzes to show knowledge has been embedded in their long term memory.

To quip pupils with knowledge and understanding which will enable them to access KS3 and beyond.
